Discover the eye-catching flashlights lanterns combo

MCL88

Camping Lantern with strong Cooling Fan, FM radio & Mosquito Repeller

Product Features

MCL88 is perfect for a weekend trip with the family. Our multi-function camping fan is designed to be versatile. You can hang it inside your tent, or you can put it on a picnic table while you talk, eat, or just enjoy the company of your friends and family. Furthermore, you can listen to the FM radio while you are outdoor and at the same time to repel mosquito away during summer hot time while you are outdoor. This outdoor gear is perfect for camping, hiking, fishing, outdoor adventures, BBQ, patio as well as for emergency preparedness.

Item Specifications

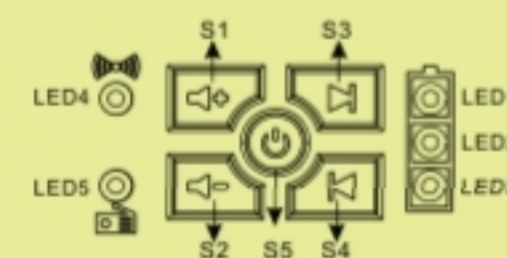

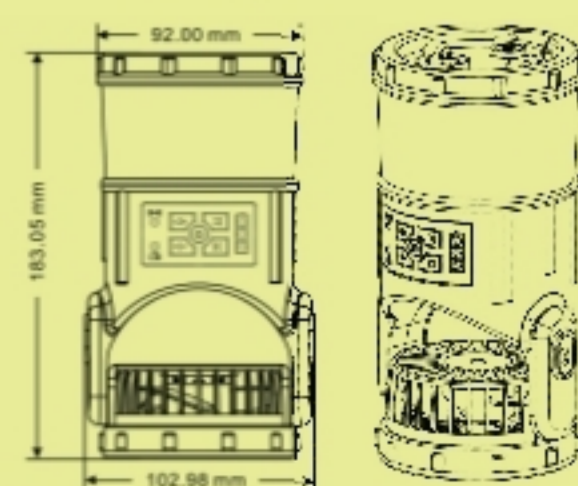

- VERSATILITY** - A versatile camping light (24 LEDs) with a built in LED light (3W), FM radio and mosquito repeller. All functions can be used simultaneously. The light and the fan are both adjustable in 3 modes (low/medium/high), so you can choose the mix of modes you want to use outdoor.
- BUILT IN HOOK AND HANDLE** - Cooling fan & light for outdoor is strong. The hanging hook comes with a reinforced hinge to hang inside your tent or outside. Designed to be hung high up with the hanging loop to lighten the room
- STRONG LIGHT INTENSITY** - 24 LEDs & 3W LED provide ample supply of light and can be used in high / medium / low mode. This versatile flashlight and lantern is waterproof undoubtedly durable and reliable way to be certain that you have a perfect lighting all the time. It is built with an immensely vivid lamp that boasts a superior lumen number, long beam length and remarkable beam intensity.
- RECHARGEABLE** - Our camping light and fan combo uses rechargeable battery of 7,800 mAh. The power will last for up to 12 hours for camping light and LED flashlight, up to 30 hours for cooling fan, up to 150 hours for FM radio (standalone use) and 780 hours for mosquito repeller (standalone use).
- WEATHER RESISTANT (IPX5)** - No worry to use outdoor even under adverse weather condition
- DROP RESISTANT (1m)** - withstand drop height of 1m.

Technical Parameters

- Battery capacity : 7,800mAh(3.7V/3*18650)
- Input : 500mA-1,800mA 5V
- Charging Time : 5H
- Camping light (24 LEDs) : Strong - upto 5H, Medium - upto 8H, Low - 12H
- LED flashlight (1W LED) : Strong - upto 5H, Medium - upto 8H, Low - 12H
- Cooling Fan : Strong - upto 5H, Medium - upto 14H, Low - 30H
- FM radio : Upto 150H under standalone use
- Mosquito repeller : Upto 780H under standalone use
- Standby current under shutdown mode : 50 uA

Product Parameters

- Size : 183 X 103 mm
- Weight : 510 g
- Lithium ion battery : 3*18650 (7,800 mAh)
- Input port : MicroUSB, Smart Charge 1.8A Max

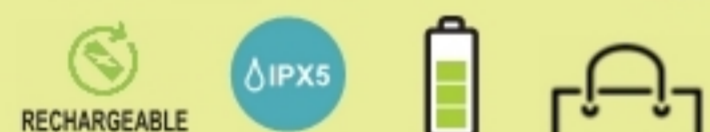

Water-resistant USB Cover for charging MCL88

Camp Light (24 LEDs) FlashLight (3W) & Cooling Fan Hook & Handle (Fan & Flashlight) 2 Side Buttons (Fan & Flashlight)

Quick Guide (All functions can work simultaneously)

Function	Description
LED Flashlight (3W) (100-110 Lumens)	3 modes - Low / Medium / Strong On - Press for 2 seconds (Button at the side of fan arm) Switching mode by pressing button again Off - Press for 2 seconds
Camping light (24 LEDs) (65-70 Lumens)	3 modes - Low / Medium / Strong On - Press for 2 seconds (Button at the bottom with handle) Switching mode by pressing button again Off - Press for 2 seconds
Cooling Fan	3 modes - Low / Medium / Strong On - Press for 2 seconds (Button at the other side of fan arm) Switching mode by pressing button again Off - Press for 2 seconds
FM Radio / Mosquito Repeller	Press S5 for 2 seconds to switch ON FM radio. Press once will ON the mosquito repeller. Press again will have both FM radio and mosquito repeller in function. Press again will OFF. Press S5 longer to switch ON again. S1 is for volume increase control and S2 is volume decrease control. S3 for next channel and S4 is backward channel. For selecting channel, long press S1/S2 will auto search & save the channel (Under OFF mode, there will be memory). After channel is saved, press again to search channel.
LED status indicators	LED 1/LED 2/LED 3 are power indicators. LED4 indicates mosquito repeller function is ON. LED5 indicates FM radio is ON. 1 LED ON indicates low power 2 LEDs ON indicates medium power 3 LEDs ON indicates high power LED 1/LED 2/LED 3 will light up accordingly for 10 seconds after each function button is pressed. When battery power is low, LED3 will flash (battery voltage needs to be at 3.1V for operation). LED flashes during charging the product. It will advance from 1 LED to 3 LEDs based on the battery power inside. Long bright light represents the proportion of remaining battery power, which is about 10%-40%, 40%-70% and 70%-100% respectively for 1 LED to 3 LEDs. When the flashlight is fully charged, the 3 LEDs stay on. LED 4 / LED 5 status indicator will stay on and will not OFF.

HEALTH & PERSONAL CARE

Ai408

Anion Air Purifier and Ionizer

Product Features

An air ionizer is a device that is intended to purify the air in a room by electrically charging the air molecules. Instead of using fans and filters to purify the air, an air ionizer uses ions to remove microscopic particles from the air. An air ionizer makes the air in a room healthier for people who are suffering from asthma, allergies, impaired immunity or respiratory ailments because fewer allergens circulate into the lungs. It is one of the better small and compact negative ion generators on the market. It plugs directly into any portable power bank or USB interface of our desktop computer or laptop will be producing over 40,000,000 negative ions per cubic centimeter.

Using this portable negative ion air purifier in any room or any public area you spend the most time can eliminate dust, pollen, odors and even airborne bacteria and viruses. It will also counteract the harmful effects of excessive positive ions in your home or office. Negatively charged ions are beneficial for increasing the amount of oxygen reaching your brain and can lead to increased alertness and more mental energy. They are also believed to help normalize serotonin production which can help to reduce stress and tension. This plug-in negative ion purifier would be particularly useful near positive ion generating electrical equipment like televisions or where you use your computer.

Item Specifications

The Personal USB Mini Ozone Anion Air Purifier is Super mini, compact and modern design. Such a little unit, yet has big results. It's **Amazing and Effective to enhance Quality of Life!**

Adopt the latest technology

With the advanced Microcomputer Control Technology, it does not need you to replace any filters, as it isn't sucking the air like a vacuum purifier freshener, but simply "charges" the air and keeps it clean, fresh and odor free.

Combat bacteria

Kill all kinds of bacteria to avoid the growth of mildew. Very ideal for use in refrigerator to keep the foods fresh for longer time.

Reduce odor

Neutralizes or eliminates unpleasant odors with fresh air inside refrigerators, closets, bathrooms and cars, pantries, pet zones and wherever else you need it.

Whisper-quiet operation

Thanks to its Whisper-quiet operation, we can keep the air cleaner running all night and have a nice dream without annoying noise.

Technical Parameters

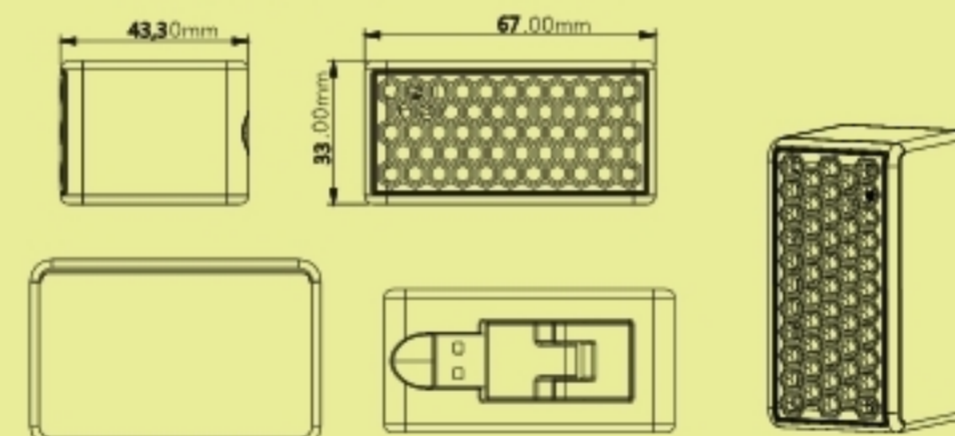

- Nominal Voltage : DC5V
- Operating Voltage : DC5V±10%
- Operating Current : 40~100mA
- Output voltage : -DC9.0KV±1.0KV (RH : 70%, Temp : 18°C)
- Anions : ≥ 40 millions (Distance between ionizers and measuring equipment -10cm)
- O₃ : <0.05 ppm
- Dielectric strength : External power cable box AC3000V 5mA 3S no sign of piercing through
- Operating temp : -10°C ~ +60°C Storage Temp : -20°C ~ +70°C
- Moisture resistance : Not connected to power supply, under environmental condition of temp 25°C, humidity of 93% stored for 12 hours, normal.
- High Temp Property : Not connected to power supply, under environmental condition of temp +70°C stored for 12 hours and take out back to room temp. Normal.
- Low Temp Property : Not connected to power supply, under environmental condition of temp -20°C stored for 12 hours and take out back to room temp. Normal.
- Drop Test : Drop from 60 cm high and free fall to a wooden board of 3cm thick, normal use after connected to power supply.

Simply "charges" the air and keeps it clean, fresh and odor free
Your personal own "clean" chamber in public area

Enhance
Quality of life

Product Size: 33 x 43.3 x 67mm & Weight: 85g

Test Performance

Inspected Item	Sample 1	Sample 2	Sample 3
Output Voltage (kv)	-9.24	-9.10	9.31
Anions per cm ³	45.9 millions	45.4 millions	45.8 millions
Test Equipment	Anion detector (DLY-3)	Voltage Resistance Equipment (LW2670A)	Digital High Voltage Meter (CC1940-1)

Test Conditions

Temperature 18°C Humidity : 70%

Remarks

Output voltage of high voltage generator and the concentration of negative ions will be affected by the environment. We should test for comparison in the same test environment.

AUTOMOBILE ELECTRONICS

PCC2818B

Car Charger & Ionizer with emergency breaker

Product Features

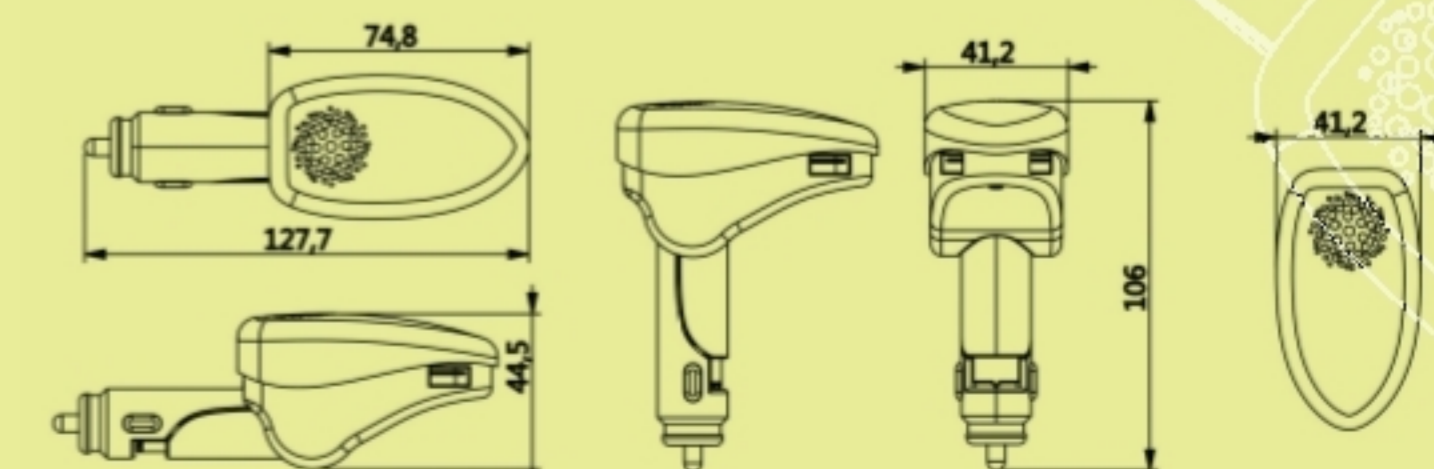

- The product is an multi-function car charger but also a decorative electronic product
- Your portable ionizer inside your car
- 2 USB outputs can be used simultaneously for charging your mobiles, each with large current output at @2.1A
- Emergency safety tool of glass breaker (hidden inside)
- Anions : 3 millions / cm³ (eliminate dust, pollen, odors and even airborne bacteria and viruses)
- O₃ < 0.02 ppm
- LED indicator of power status

Item Specification

- Anions:** 3 millions / CM³ (eliminate dust, pollen, odors and even airborne bacteria and viruses. Just plug in 12V power supply to get the anions)
- Hidden glass breaker:** Point the glass breaker tube inside car charger socket to the centre of glass window, apply force slightly and the window glass will be broken instantly. (Note: Use only under emergency. If require for test purpose, please use tempered glass with thickness of 3-6mm. The glass breaker is hidden inside and do not use your hand for test. There is a mark "OPEN" where you can take out the glass breaker built into the tube adhered to the car charger socket)
- USB2.0 Output:** There are 2 USB outputs. When the product is inserted into car cigarette socket, the 2 USBs are in use and plug in USB cable to charge your electronic device.
- LED indicator:** When there is power supply, a blue LED light is seen at the ventilation slots indicating power is connected to the product.
- Drop Test Resistance:** 1.2m

Product Parameters

- Size: 127.7 x 44.5 x 41.2mm
- Weight: 70g
- Input: 12V-24V (from car cigarette socket)
- Output: 2 USB outputs to charge external devices simultaneously, each at 2.1A and max output current 2.4A. Auto-charging.

Simply "charges" the air and keeps it clean, fresh and odor free inside your car

Technical Parameters

- Output interface :** 2 USB ports with high current output at 2.1A can be used at the same for charging both mobiles of Android and IOS system. Make sure all mobiles and tablets can be charged same as original charger.
- Output current :** 2.1A
- Anion :** ≥ 3 millions / CM³ (Measured distance of 10 cm between ionizer and detector)
- O₃ :** 0.02PPM
- Short circuit protection:** Output will be stopped immediately when short circuit.
- High Temperature Protection:** Built in temperature detector will stop charger when temperature is too high.
- Over-current protection:** Output will be stopped immediately when over-current.
